

# MAKING TV APPS

## WITH METROLOGICAL APPLICATION FRAMEWORK

Presented by [Trifon Statkov](#) / [@tricho340](#)

The logo for Strypes features the word "Strypes" in a large, black, sans-serif font. Below it, the tagline "TECHNOLOGY TOGETHER" is written in a smaller, orange, sans-serif font. The entire logo is contained within a white rectangular box.

**Strypes**  
TECHNOLOGY TOGETHER

# HELLO.

My name is Trifon and I work @

The logo for Strypes, featuring the word "Strypes" in a bold, black, sans-serif font. The letter "S" is significantly larger than the other letters and is positioned to the left of the word "trypes". The entire logo is contained within a white rectangular box.

Strypes

as JavaScript developer.

**WHY MAKE TV APPS?**

# BECAUSE:

# HOW WE MAKE TV APPS WITH JAVASCRIPT?

(There are a lot of options)

**WE USE...**

# MAF

(METROLOGICAL APPLICATION  
FRAMEWORK)

# MAF APPS AUDIENCE

## Expose your App to Millions of Customers

The TV App Store experience is currently available in the following European countries:

**The Netherlands:** Ziggo

🏠 7.0 million

**Switzerland:** UPC-Cablecom

🏠 2.2 million

**Hungary:** UPC

🏠 1.5 million

**Czech Republic:** UPC

🏠 1.4 million

**Germany:** Unitymedia Kabel BW

🏠 12.6 million

**Ireland:** UPC

🏠 858,000

**Poland:** UPC

🏠 2.7 million

**The Liberty Global TV App Store is an open ecosystem.  
Anyone can develop and submit an App.**

To ensure Third party Apps are stable, reliable, have good performance, do not interfere with other Apps, functionalities and the user interface, and are free of explicit and offensive material Liberty Global will review all TV Apps that are submitted.

**HOW IT WORKS?**

<http://yourapp.com>

TV

HDMI CABLE

STB

(Set-Top Box)

INTERNET

RC

(Remote Control)

(Our "mouse" and "keyboard")

**IT'S JUST A WEB APP...**

**BUT IT RUNS ON...**

# THIS.

1 GB RAM

500 GB Flash Memory

NOTE: (New) devices have powerful GPU

(closer to RPi than to your game machine)

# LET'S START COOKING!

**WHAT INGREDIENTS DO WE NEED?**

**+ BROWSER**

**+ SIMPLE TEXT EDITOR**

# THE ADVANCED SETUP + RPI (RASPBERRY PI)

(connect it to your TV via HDMI cable)

(control the RPi via the HDMI-CEC interface)

# CLONE THIS REPO:

MAF REPO

**NPM INSTALL**

**NODE\_PORT=8080 NODE SDK.JS**

**CREATING AN APP**

# (ALMOST) A WEB APP

Limited CSS (and it looks like JSON)

Performance concerns

# TYPICAL APP STRUCTURE

com.CompanyName.app.AppName

Contents

Images

Javascript

core

views

init.js

Localization

en-EU.strings

metadata.json

# WHERE DO I PUT THIS?

In MAF-SDK-FOLDER/apps/ folder.

# TESTING YOUR WORK

[HTTP://LOCALHOST:8080](http://localhost:8080)

# OUT OF THE BOX

MAF.Room (WebSockets)

UI components

Views (it's kind of MVC)
